

RN-Mail

In spring there is a lot of sun, go outside and have some fun

WHAT HAPPENED AT NRN?

eTwinning „Happy Easter“

We hate war and want to live in peace and friendship with the other European countries. That's why Ms. Schneider made a project with class 5a to learn about Poland, Turkey and Spain. The pupils presented their schools, countries and cities. They even made video calls and an Easter dictionary in six languages!

Day of Technology

Every year the 6th graders of NRN enjoy a day where they learn about MINT in projects by doing cool, funny and interesting experiments.

MINT jobs

We think that everybody can achieve everything. Mrs. Schuster informed parents and female pupils about jobs in the subjects of biology, math, chemistry and physics. The Girls' Day Academy is a huge success – like every year. Girlpower!

Open school day

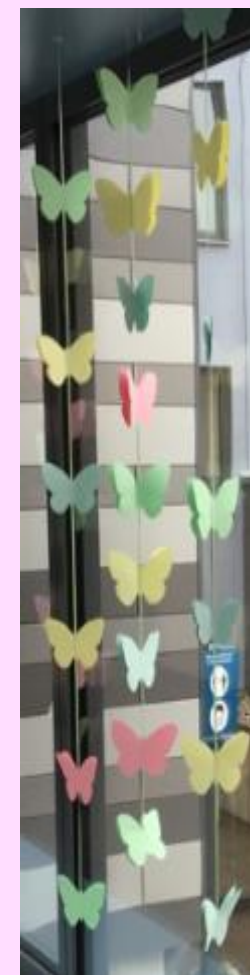

In April our teachers and pupils wanted to show the 4th graders how great our school is. Small groups of kids learned about the different subjects by playing games, doing quizzes or crafting while the parents were shown the school by our principals.

Recycling of used batteries

Although everything is new in spring but we also pay attention to sustainability. The department physics put up a bin for used batteries for our school family. The old batteries are recycled by a company to reuse the important materials in them.

Healthy recipes

Spring is not just a time for cleaning our house but also cleaning our bodies. We find healthy recipes on our homepage or the bill-board on a regular basis.

BE CREATIVE IN SPRING!

Bunnies for Easter decoration

You need:

- One or more socks
- some strings
- a black marker
- corn or cotton
- if you want a bow (optional)

(The corn will make the bunny more stable)

Tutorial:

- fill a sock with corn or cotton
- use strings to form head and tie it
- cut off some parts of the sock for the ears
- draw the face (and if you want tie a bow around it)

The perfect Easter eggs

Of course, you can dye Easter Eggs in a natural way too for example with **curcuma**, **beetroot** or **red onion skin**.

Curcuma gives a stronger **yellow**:

Cook the powder in hot water until the color is strong enough. Then strain it and the **yellow** is ready.

Beetroot gives a **stronger** and **darker red**, the onion skin creates a **lighter** and **softer red**. The method is the same here:

The vegetables are cooked in hot water until the **color** fits. Then take the **beetroot** or the **onion skin** out of the water with a spoon and the two **colors** are finished.

The coloring works like artificial **colors**: Put the eggs in the **colorful** water and wait until they reach the wanted brightness. And **that's It!!!**

ENJOY SPRINGTIME!

The perfect spring day

Activities:

- ♥ Flower picking
- ♥ Strawberry picking
- ♥ Picnic with friends
- ♥ Reading outside
- ♥ Cycling
- ♥ Roller skating
- ♥ Go for a walk

Movies/Series

- ♥ Anne with an e
- ♥ Bambi
- ♥ Snow White
- ♥ Little Women
- ♥ Enola Holmes
- ♥ Tangled

Spring must-haves!

- ♥ Flower dresses
- ♥ Blouses
- ♥ Much jewellery
- ♥ Chucks, Mary Janes
- ♥ Picnic basket
- ♥ Inline/roller skates
- ♥ Tulips

SPRINGTIME POEMS

Movie Review

~ Enola Holmes ~

The Netflix original movie Enola Holmes, which is set in England in 1884, is about the rebellious 14 year old sister of Sherlock Holmes. Enola's mother suddenly disappears, that's why she is going on a journey to find her.

While doing so, the girl had to outwit her two older brothers and met a new friend

□□□□ / □□□□□

The movie has an awesome plot, since it is interesting to follow the young woman played by the famous actress Millie Bobby Brown. Although it isn't always historically accurate, I still enjoyed watching it.

The easter bunny's feet

Go hop hop hop

While its pink ears

Go flop flop flop

It is running on its way

To bring our eggs on
easter day
